Include HTTP Referrer Policy Attribute in HTTP Referrer-Policy Header

THE INFORMATION IN THIS ARTICLE APPLIES TO:

- EFT v8.0 and later
- Refer to Advanced Properties in the EFT help file for details of adding/editing Advanced Properties.

DISCUSSION

By default, the HTTPReferrerPolicyAttributeString is set to "no-referrer" in the HTTP Referrer-Policy Header. To include a custom string in the HTTP Referrer-Policy Attribute in the HTTP Referrer-Policy Header, specify the advanced property described below. The string can be up to 255 characters.

{

"HTTPReferrerPolicyAttributeString":"Custom value"

}
