Run Transfer actions in parallel (in an IF group)

THE INFORMATION IN THIS ARTICLE APPLIES TO:

- EFT v8 and later

DISCUSSION

This advanced property determines whether to run a group (grouped by IF Statement) of transfer actions in parallel.

Add the name:value pair below to the AdvancedProperties.JSON file in the \ProgramData\ folder for EFT (for example, **C:\ProgramData\Globalscape\EFT Server**):

```
{
"ExecuteTransferActionsInParallel":true
}
```

Set to 1 to enable. Default is 0.

MORE INFORMATION

For more information about Advanced Properties, search for "Advanced Properties" in the help for your version of EFT.

For more information about using the IF statement, search for "File System Conditions" in the help for your version of EFT.

For pre-v8 versions of EFT, the registry value is

SOFTWARE\Wow6432Node\GlobalSCAPE Inc.\EFT Server 7.2
