

# Using a script to export a list of Secure FTP/EFT Server users to Excel

## THE INFORMATION IN THIS ARTICLE APPLIES TO:

- EFT Server (All Versions)
- Secure FTP Server (All Versions)

## QUESTION

How can I use a script to export a list of Server users to Excel?

## ANSWER

Following is a sample script that gets a list of users using the COM interface.

1. Download [CreateUserListSpreadSheet.txt](#) or copy the script below into Notepad.
2. Modify the server administrator login information as necessary.
3. Save the script with a .VBS extension.
4. At a command prompt, [use CSCRIPT](#) to run the script or, in Windows XP and newer operating systems, double-click the file to execute the script.

**\*\*Be sure to edit the script to change the Server, Port, Username, and Password to your Server's settings. Remove any extra blank lines introduced when you copy and paste the text.\*\***

```
' FILE: CreateUserListSpreadSheet ' CREATED: 13 OCT 2004 GTH ' PURPOSE: List the users of a
site and create an excel spreadsheet. ' Set SFTPServer =
WScript.CreateObject("SFTPCOMInterface.CIServer") CRLF = (Chr(13)& Chr(10)) txtServer =
"localhost" txtPort = "1100" txtUserName = "eft" txtPassword = "eft" ' On Error Resume Next
SFTPServer.Connect txtServer, txtPort, txtUserName, txtPassword If Err.Number <> 0 Then
WScript.Echo "Error connecting to '" & txtServer & ":" & txtPort & "' -- " & err.Description
& " [" & CStr(err.Number) & "]", vbInformation, "Error" WScript.Quit(255) Else WScript.Echo
"Connected to " & txtServer End If set Sites=SFTPServer.Sites Set oExcel =
WScript.CreateObject("Excel.Application") oExcel.visible = true Set oWorkbook =
oExcel.Workbooks.Add For i = 0 to SFTPServer.Sites.Count-1 set theSite=Sites.Item(i) Set
theSheet = oWorkbook.Worksheets.add theSheet.name = theSite.Name theSheet.Cells(1, 1) =
"Users:" arUsers = theSite.GetUsers() For j = LBound(arUsers) to UBound(arUsers)
theSheet.Cells((j+2), 1) = arUsers(j) Next theSheet.Columns("A:A").EntireColumn.Autofit Next
Set oExcel = nothing SFTPServer.Close Set theSite = nothing Set SFTPServer = nothing
```
