

Script have slight delay when running commands such as WScript.Quit

**THE INFORMATION IN THIS ARTICLE APPLIES TO:**

- Secure FTP Server™
- EFT Server™
- CuteFTP® for Windows

**SYMPTOM**

Script have slight delay when running commands such as WScript.Quit.

**RESOLUTION**

Use the latest Windows script host. When running scripts that use the Windows Script Host on some computers—such as using cscript.exe to drive Custom Commands in Secure FTP Server or EFT Server—it may take several seconds for the script to terminate, even if the script itself has completed. This unnecessary delay can be solved by simply updating the Windows Script Host on the affected computer to the latest version.
