

# Unable to import SSH keys

## **THE INFORMATION IN THIS ARTICLE APPLIES TO:**

- EFT Server
- Secure FTP Server

## **SYMPTOM**

Unable to import SSH keys

## **RESOLUTION**

If SSH keys fail to import with no error message, make sure you are importing the public opposed to the private key. Normally, public keys are named \*.pub.

For more information about importing SSH keys, refer to "Viewing, Importing, and Deleting Client Keys. in your version of the [online help](#).
