# What type of SSL Certificate does EFT Server create?

**THE INFORMATION IN THIS ARTICLE APPLIES TO:**

- EFT Server (All Versions)

**QUESTION**

What is the certificate format that EFT Server creates?

**ANSWER**

X.509, base64 encoded.

EFT Server can import a digital certificate in the following formats: PEM, Base64 Encoded X509, DER Encoded X509, PKCS#7, PKCS#12.

For more information about creating SSL certificates, refer to "Creating SSL Certificates" in the help documentation.
