

## CuteFTP 8 scripting error: Library not registered

### THE INFORMATION IN THIS ARTICLE APPLIES TO:

- CuteFTP Pro® 8.0.0

### SYMPTOMS

Attempts to run a script that calls the CuteFTP 8 Transfer Engine (TE) results in the following Windows Script Host error: Library not registered.

### CAUSE

The CuteFTP 8.0.0 installer program failed to properly register the TE component when it was installed. As a consequence, the TE cannot be called as an object.

### RESOLUTION

[Download and install CuteFTP 8.0.1+](#). The cause of this problem has been fixed in CuteFTP 8.0.1 which was released August 17, 2006.
