Which local security policy setting is needed for Active Directory authentication?

THE INFORMATION IN THIS ARTICLE APPLIES TO:

- Secure FTP Server (All Versions)
- EFT Server (All Versions)

QUESTION

What local security policy setting is needed for users when using Active Directory authentication?

ANSWER

To use NT/AD authentication, users need **Log On Locally** access to the server computer on which GlobalSCAPE Secure FTP Server or EFT Server is installed. This is true no matter what kind of computer it is or what role it plays on the network, including a domain controller.
