

How can I configure the EFT outbound copy/move Event Rule action to route traffic through DMZ Gateway?

**THE INFORMATION IN THIS ARTICLE APPLIES TO:**

- EFT (All Versions)

**QUESTION**

Can I configure the EFT outbound copy/move Event Rule action to route traffic through DMZ Gateway?

**ANSWER**

DMZ Gateway is designed to handle inbound traffic only. Outbound connections that originate from EFT route through normal network mechanisms to reach the destination; however, it is possible to set up the EFT outbound copy/move action using a proxy server residing in the DMZ for outbound connections.

For details, refer to the [online help](#) for your version of EFT.
