

## Runtime Error 75 when publishing site using CuteSITE Builder (Deprecated)

### THE INFORMATION IN THIS ARTICLE APPLIES TO:

- CuteSITE Builder (All Versions)

### CuteSITE Builder has been discontinued

### PROBLEM

When attempting to publish your Web site using CuteSITE Builder, the following error is encountered:

Runtime Error 75

### RESOLUTION

A Runtime Error 75 can usually be overcome by following these steps:

1. Clear the files located in the **Temporary Internet Files** folder. To do so, start your Web browser and on the **Tools** menu, click **Internet Options**. On the **General** tab, follow the onscreen instructions to delete your browsing history (temporary or cached Internet files). When finished, click **OK** to exit Internet Options.
2. Start CuteSITE Builder and open your Web site. On the **File** menu, click **Publish Web Site**, click **Options** and then click **HTML Directory**. Clear the **Save copy of exported HTML locally** check box and then click **OK**.

Now you can try publishing your Web site normally.
