SAVING A FILE DIRECTLY TO A REMOTE FTP SITE

The CuteHTML Pro File Manager lets you save a file directly to a remote FTP site.

Follow these steps to save your file to the remote FTP server:

1. Connect to the Internet as you normally do.
2. Start CuteHTML Pro and open the file. Save any changes that need to be made.
3. On the **File** menu, click **Save As**.
4. In the **Look In** list, click **FTP Sites**.
5. If the desired remote FTP site is not already configured for use and shown in the list, right-click and then click **New FTP Site**.
6. Type the required FTP account details (as provided by your hosting company) and then click **Create**.
7. Right-click on the name of the newly created FTP site and then click **Open**.
8. Navigate to the desired remote folder and then click **OK**.
