

Uploads fail via Web Transfer Client if user does not have LIST permission on the server

THE INFORMATION IN THIS ARTICLE APPLIES TO:

- EFT Server version 4.x - 6.0.5

SYMPTOMS

An attempt to upload a file using the Web Transfer Client fails when the user does not have LIST permissions on the server.

CAUSE

This is a known issue with the EFT Server 4.x Web Transfer Client.

WORKAROUND

Either grant the user with LIST permission on the server or have the user use an FTP client program such as CuteFTP Professional.

RESOLUTION

This issue was solved in EFT Server version 6.0.6. LIST permission is no longer required for a WTC upload.
