Is CuteSITE Builder Compatible with Windows Vista? (Deprecated)

THE INFORMATION IN THIS ARTICLE APPLIES TO:

• CuteSITE Builder 3, 4 and 5

QUESTION

Is CuteSITE Builder compatible with Windows Vista?

ANSWER

CuteSITE Builder has not been officially tested on Windows Vista and is not supported in that environment. Even so, based on the user feedback that we have received, most users will probably not have any trouble other than with activation (registration).

For activation instructions, please browse to Knowledge Base Article ID 10322.

For technical support on CuteSITE Builder running on Windows Vista, please visit the **CuteSITE Builder User Community Forum**.
