

Activation and Registration on Windows 7 or Windows Vista

THE INFORMATION IN THIS ARTICLE APPLIES TO:

- All products when running on Windows 7 or Windows Vista

ACTIVATION OR REGISTRATION ON WINDOWS 7 OR WINDOWS VISTA

All GlobalSCAPE programs must be installed by a user that has administrator account credentials. Additionally, successful activation (registration) for most* programs requires that the program itself be started using administrator account credentials.

To activate the program on Windows 7 or Windows Vista:

1. Close the program if it is already running.
2. Click **Start**, click **All Programs**, click **GlobalSCAPE**, click on the **name of the program** (e.g.: CuteFTP Home) and then right-click on the **name of the program shortcut**.
3. Click **Run as administrator**.
4. Windows Vista User Account Controls (UAC) will ask for permission to continue. If you are using a Standard User account, then you must provide an administrator account user name and password.
5. Click **OK** or **Continue** to start the program.
6. For most programs, click **Enter Serial Number** and then follow the onscreen instructions. (If you are not prompted for the serial number when the program starts, open the Help menu and click **Enter Serial Number** or **Register your purchased copy**.)
7. After the program starts for the first time, close and then restart it from the **Start** menu. To confirm a successful activation, open the **Help** menu and click **About**. Your name and serial number should be displayed.

* **CuteFTP 4.2, CuteFTP 7 and CuteZIP 2 are known exceptions.**

- **CuteFTP 4.2:** Cannot be activated on Windows 7 or Windows Vista and will not run beyond the 30-day trial period. Registered users may be eligible to upgrade to [CuteFTP 8 Home](#) or [CuteFTP 8 Professional](#) at a reduced price.
- **CuteFTP 7:** Separate activation is required for each computer user. Administrator credentials should *not* be used for activation. For each user, Start CuteFTP 7 normally, click **Enter Serial Number** and then follow the onscreen instructions.

Activation and Registration on Windows 7 or Windows Vista

- **CuteZIP 2:** Follow the same steps as for all other programs shown above except that you must first log on to Windows using an Administrator User account.
