

Determining the Expiration Date for a User Account Using the COM API

THE INFORMATION IN THIS ARTICLE APPLIES TO:

- EFT Server (All Versions)
- Secure FTP (All Versions)

DISCUSSION

The COM API provides several methods related to user accounts. The method `GetExpirationDateAsVariant` is used to determine the expiration date of an account. For example:

```
Dim strUser: strUser = "test"

set oUserSettings = oSite.GetUserSettings(strUser)

dtAccExpDate = oUserSettings.GetExpirationDateAsVariant()

WScript.Echo ("dtAccExpDate = " & dtAccExpDate)
```

Refer to the [COM API reference](#) for details.
