Sending EFT Logs to the Windows Application Event Log

THE INFORMATION IN THIS ARTICLE APPLIES TO:

- EFT Server version 5.2.6 and later

DISCUSSION

This advanced property sends the EFT logs to the Windows Application Event Log.

(As of v5.2.11, this key applies to both the **.ex** and the **.cl** logs.)

To activate this feature, add the advanced property as shown below.

LogToWindowsEventViewer

1 to enable, 0 or does not exist (default) to disable.

In v8.0 and later, add the name:value pair to the advancedproperties.json file as described in the "Advanced Properties" topic in the online help for your version of EFT.

```
{
"LogToWindowsEventViewer":true
}
```

In versions prior to v8.0, add the DWORD LogToWindowsEventViewer=1 to:

On 32-bit systems:

[HKEY_LOCAL_MACHINE\SOFTWARE\GlobalSCAPE Inc.\CuteLogger]

On 64-bit systems:

[HKEY_LOCAL_MACHINE\Software\Wow6432Node\GlobalSCAPE Inc.\CuteLogger]
