

Enable Oracle

THE INFORMATION IN THIS ARTICLE APPLIES TO:

- EFT Server version 5.1.7 through 5.x (Oracle connectivity is provided with the Auditing and Reporting module in versions 6.0 and later.)

DISCUSSION

This registry entry only applies if you are using an Oracle auditlogger.dll provided by GlobalSCAPE. With this registry entry enabled, if your EFT Server uses an Oracle database, you can upgrade to future releases by installing your custom auditlogger.dll in the EFT Server installation directory.

To activate this feature, create the following key:

On 32-bit systems:

```
[HKEY_LOCAL_MACHINE\SOFTWARE\GlobalSCAPE Inc.\EFT Server 3.0\]
```

On 64-bit systems:

```
[HKEY_LOCAL_MACHINE\Software Wow6432Node\GlobalSCAPE Inc.\EFT Server 3.0\]
```

```
["DBType"]=dword:00000000
```

DWORD; if the key does not exist or is 0 = MSSQL; 1 = Oracle
