**QUESTION**

Is CuteFTP Mac compatible with Mac OS X 10.6 (Snow Leopard)?

**ANSWER**

**CuteFTP Mac Pro** versions 3.06 or late run on OS X 10.6 (Snow Leopard).

**CuteFTP Mac Pro** version 2 does not run on OS X 10.6 (Snow Leopard).  CuteFTP Mac Pro 2 was designed for use on a Power PC-based Mac computer.  It was not designed for use on an Intel-based Mac computer and has not been officially tested in that environment. It is not a Mac Universal application. *CuteFTP Mac Professional 2 is not supported on OS X 10.6 or on Intel-based Mac computers.*

**CuteFTP Mac Home** version 1 does not run on OS X 10.6 (Snow Leopard).  CuteFTP Mac Home 1 is not compatible with Intel-based Mac computers and is only intended to be used on Mac OS X versions *up to* 10.3.8 running on a Power PC processor.
