Does the Copy/Move Event Rule Action support resumed transfers?

THE INFORMATION IN THIS ARTICLE APPLIES TO:

- EFT Server (All Versions)

QUESTION

Does the Copy/Move Event Rule Action support resumed transfers?

ANSWER

Yes. The first attempt overwrites the file. All subsequent retries (in the same rule context) use resume logic. This logic applies to all protocols (SFTP, FTP/S, HTTP/S).

Refer to "Copy/Move (Push) File to Host Action" in the online help of your version for more information.
