Do EFT Server Event Rules support AD impersonation?

THE INFORMATION IN THIS ARTICLE APPLIES TO:

- EFT Server (All Versions)

QUESTION

Do EFT Server Event Rules support AD impersonation?

ANSWER

No, EFT Server has no AD impersonation in Event Rules. EFT Server executes client-related Event Rules without impersonation, except in the case of Folder Monitor events when folder access credentials are specified in the rule. In this case, some Actions are executed in the context of the specified credentials: PGP, Copy/Move, AS2Send, and Download.
