How do I backup/restore my scheduled uploads?

THE INFORMATION IN THIS ARTICLE APPLIES TO:

- CuteFTP Pro®, all versions

QUESTION

How do I backup/restore my scheduled uploads?

ANSWER

Scheduled uploads and all of the data in the queue window is stored in a file named CIS_Queue.dat, which is located in the same directory as sm.dat.

The location in which CuteFTP's data files are stored depends on your version of Windows:

- Windows XP: **C:\Documents and Settings\USERNAME\Application Data\GlobalSCAPE\CuteFTP(or CuteFTP Pro)\VERSION\SM.DAT**
- Windows Vista: **C:\ProgramData\GlobalSCAPE\CuteFTP 8 [Home/Professional]**
- Windows 7: **C:\Users\USERNAME\Application Data\Roaming\GlobalSCAPE\CuteFTP Pro\8.0\SM.DAT**

(You may need to select "View hidden files and folders" on the **View** tab in **Folder Options**.)

For the procedure for backing up files, refer to the online help for your version of EFT.
