## THE INFORMATION IN THIS ARTICLE APPLIES TO:

• CuteFTP Pro®, all versions

## QUESTION

How do I backup/restore my scheduled uploads?

## ANSWER

Scheduled uploads and all of the data in the queue window is stored in a file named CIS\_Queue.dat, which is located in the same directory as sm.dat.

The location in which CuteFTP's data files are stored depends on your version of Windows:

- Windows XP: C:\Documents and Settings\USERNAME\Application
  Data\GlobalSCAPE\CuteFTP(or CuteFTP Pro)\VERSION\SM.DAT
- Windows Vista: C:\ProgramData\GlobalSCAPE\CuteFTP 8
   [Home/Professional]\
- Windows 7: C:\Users\USERNAME\Application
  Data\Roaming\GlobalSCAPE\CuteFTP Pro\8.0\SM.DAT

(You may need to select "View hidden files and folders" on the **View** tab in **Folder Options**.)

For the procedure for backing up files, refer to the online help for your version of EFT.
