

How can I generate a CSR and key file for use with Mail Express 3?

THE INFORMATION IN THIS ARTICLE APPLIES TO:

- Mail Express, version 3.0.0 and later

QUESTION

How can I generate a CSR and key file for use with Mail Express 3?

ANSWER

OpenSSL can be used to generate a private key and a certificate signing request for use with acquiring and using an SSL certificate with Mail Express.

Download the attached PDF for a detailed procedure.

NOTE: The OpenSSL application does not need to be installed on the same computer as Mail Express to perform this operation. For example, you can install the application on your workstation.
