

Critical Pre-Installation Steps for Mail Express

THE INFORMATION IN THIS ARTICLE APPLIES TO:

- Mail Express version 3.0 - 3.1.x

For Mail Express version 3.2 and later, please refer to
<https://kb.globalscape.com/KnowledgebaseArticle10643.aspx>.

DISCUSSION

The Mail Express server application relies on a number of other existing technologies and services in order to provide fully rounded functionality. Before the installation of the Mail Express server can begin, several critical steps must be completed to properly prepare the environment for the new Mail Express installation. Once this has been completed in its entirety, you may then initiate the Mail Express installation.

The attached PDF provides a checklist of steps to complete before you install Mail Express Server.
