

Error occurred while attempting to retrieve product name from resource bundle

THE INFORMATION IN THIS ARTICLE APPLIES TO:

- Mail Express, all 3.x versions

SYMPTOM

When the Mail Express Server connects to a version of the DMZ Gateway earlier than 3.1, an error message similar to the following is generated:

```
07:14:45,404 ERROR Error occurred while attempting to retrieve product name
from resource bundle
```

```
java.util.MissingResourceException: Can't find resource for bundle

```

RESOLUTION

This error will not affect the operation of Mail Express with the DMZ Gateway and may be safely ignored. Furthermore, the error message may be filtered out of the log file and Windows Event Viewer Application log by replacing the Mail Express Server log configuration file **<Install Directory>\DMZ Gateway\conf\server_log_config.xml** with the attached modified version.

MORE INFORMATION

The error message will be logged to the following locations:

- The DMZ Gateway Server's log file: \DMZ Gateway\logs\DMZGatewayServer.log
- The Windows Event Viewer Application log
