

Disable X-FRAME-OPTIONS for WTC and PTC

THE INFORMATION IN THIS ARTICLE APPLIES TO:

- EFT Server Enterprise version 6.4 - 6.5.x

DISCUSSION

Starting with EFT Server v6.4, the X-FRAME-OPTIONS header will be sent with a value of SAMEORIGIN for the Plain-Text Client (PTC) and the Web Transfer Client (WTC). You can disable it with the registry value below:

32-bit: HKEY_LOCAL_MACHINE\Software\GlobalSCAPE Inc.\EFT Server 4.0\EFTClient\

64-bit: HKEY_LOCAL_MACHINE\SOFTWARE\Wow6432Node\GlobalSCAPE Inc.\EFT Server 4.0\EFTClient\

DWORD: disable_xframeoptions = 00000001

The service must be restarted after setting this value.
