Has penetration testing been done against EFT Server?

THE INFORMATION IN THIS ARTICLE APPLIES TO:

- EFT Server, all versions

QUESTION

Has penetration testing been done against EFT Server? If so, what were the results?

ANSWER

In addition to GlobalSCAPE's own security testing, a number of GlobalSCAPE's customers have performed penetration testing using their own internal security teams and tools as well as employing a number of 3rd-party vendors to "pentest" EFT Server. Any security vulnerabilities found were promptly addressed and included in subsequent patch or major release versions of the software, as captured in the version history. (Search the version history page for "security" for details.)
