How can I send an email notification when a particular user uploads a file to EFT?

THE INFORMATION IN THIS ARTICLE APPLIES TO:

- EFT version 6.x and later

QUESTION

How can I send an email notification when a particular user uploads a file to EFT?

ANSWER

Create a **File Uploaded** Event Rule with the **If Logon Name is** Condition and the **Send Notification Email** Action. Then in the email, add user variables such as %USER.LOGIN% and file system variables such as %FS.FILENAME%. For multiple users, you could use the **If User Groups** Condition.
