Can I send files to partners outside of my internal network?

THE INFORMATION IN THIS ARTICLE APPLIES TO:

- Mail Express version 3.0 and later
- Workspaces, in EFT v7.1 and later

QUESTION

Can I send files to partners outside of my internal network?

ANSWER

Yes! Mail Express and EFT Workspaces allows users to send large email file attachments securely to recipients inside or outside of their organization.

Recipients can respond to the email to return files to the sender. In Mail Express v4.1 and later, and in EFT v7.4.5 and later, the message body is also encrypted.

Refer to the online help for details of sending files to external users, receiving files from external users, and sending invitations.
