

On guest (external user) accounts, the value in Last Modified by field is "[ws-invite]".

THE INFORMATION IN THIS ARTICLE APPLIES TO:

- EFT, v7.1 and later

SYMPTOM

On guest (external user) accounts, the value in **Last Modified by** field is "[ws-invite]".

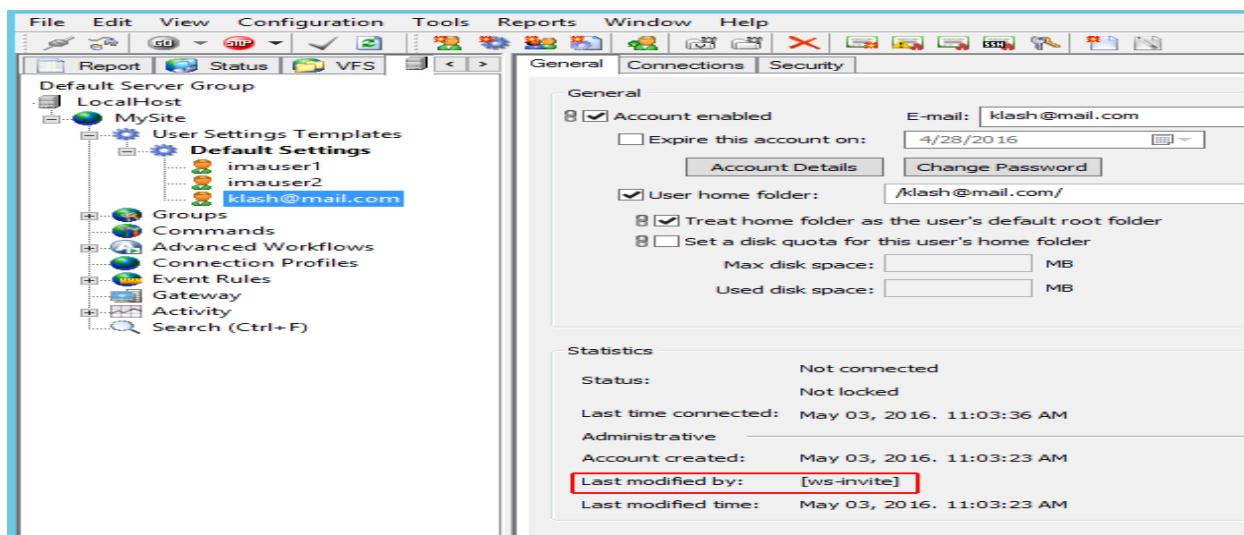

WORKAROUND

This behavior is as designed.

MORE INFORMATION

After an external user is invited, accepts the invitation, and then verifies their account on the server, a user account is created under the Default User Settings Template. The **Last Modified** value for the guest account is "[ws-invite]".

In v7.4.7 and later, the ability to create Workspaces is disabled by default on the Guest Accounts Settings Template. Disabling creation of Workspaces on Guest Accounts ensures that Workspaces licenses are available for internal users. On the Connections tab, you can Allow Creation of Workspaces on the Guest Accounts Settings Template for all Guest accounts or on each Guest account individually. This applies all guest accounts, including those created when using the Drop-Off portal.

On guest (external user) accounts, the value in Last Modified by field is "[ws-invite]".
