# Specify the SAML signature algorithm

**THE INFORMATION IN THIS ARTICLE APPLIES TO:**

- EFT v7.3.3 - 7.4.13.15
- EFT v8.0 adds advanced properties to an AdvancedProperties.json file instead of the registry. Refer to the EFT v8 help for information about editing the **AdvancedProperties.json** file.

**DISCUSSION**

SAMLSSOSignatureAlgo is used to specify the SAML signature algorithm to use. The SAML signature algorithm is an SML security signature algorithm URI or suitable abbreviation (e.g., rsa-sha256). Refer to RFC 4051,http://www.ietf.org/rfc/rfc4051.txt, for more information about XML Security Uniform Resource Identifiers (URIs).

**In v8.0 and later:**

Add the name:value pair to the AdvancedProperties.JSON file as described in the "Advanced Properties" topic in the online help for your version of EFT.

{

"SAMLSSOSignatureAlgo": "**Specify the SAML Signature Algorithm to use**"

}

**In versions *prior* to v8.0:**

**32-bit:**

HKEY_LOCAL_MACHINE\Software\Software\Globalscape Inc.\EFT Server 7.3\

**64-bit:**

HKEY_LOCAL_MACHINE\Software\WOW6432Node\GlobalSCAPE Inc.\EFT Server 7.3\

**Type:** STRING

# Specify the SAML signature algorithm

**Value name:** SAMLSSOSignatureAlgo

**Default Value:** rsa-sha256

**Maximum Length:** 255

**Cached:** yes

**Backup/Restore:** Yes

**Restart required:** Yes
