Specify maximum timeout for multipart upload

THE INFORMATION IN THIS ARTICLE APPLIES TO:

- EFT v7.2 and later
- **EFT v4.x to v7.4.x** stores advanced properties in the registry.
- **EFT v8.x** stores Advanced Properties in a JSON file.

When you upgrade from EFT v7.4.x to EFT v8, the non-default settings that you have defined in the registry will be added to the Advanced Properties file during upgrade. (Default settings become part of the EFT configuration files.) For a more on how to use advanced properties, and a spreadsheet of the advanced properties, please refer to the "Advanced Properties" topic in the help for your version of EFT.

DISCUSSION

The MultipartUploadSessionTimeoutSecs value sets the time period in seconds for the max time that any section of a multipart upload can go without the server receiving more information. Once this limit is reached, the server considers this upload a failure.

In EFT v8 and later:

Add the name:value pair to the AdvancedProperties.JSON file in EFT's \ProgramData\ directory as described in the "Advanced Properties" topic in the online help for your version of EFT.

{

"MultipartUploadSessionTimeoutSecs": 30

}

In versions prior to v8.0:

32-bit:

HKEY_LOCAL_MACHINE\Software\Software\Globalscape Inc.\EFT Server 7.2\

64-bit:

Specify maximum timeout for multipart upload

HKEY_LOCAL_MACHINE\Software\WOW6432Node\GlobalSCAPE Inc.\EFT Server 7.2\

Type: DWORD

Value name: MultipartUploadSessionTimeoutSecs

Default Value: 30

Minimum Value: 10

Maximum Value: 4294967295

Cached: no

Backup/Restore: no

Restart required: Yes
