

OPTS MLST and MLSD commands expect all lowercase

THE INFORMATION IN THIS ARTICLE APPLIES TO:

- EFT, v6.5 - v7.1.5

SYMPTOM

OPTS MLST and MLSD commands expect all lowercase for the parameters.

WORKAROUND

In EFT version 6.5 through 7.1.5, the OPTS MLST command expects all lowercase for the parameters.

The below screenshot shows this function working properly when all lowercase is used for the command (green) and the response when all lowercase is NOT used (red).

The screenshot shows a file explorer window for 'localhost' with a directory listing:

Name	Size	Type	Modified	Attributes	Description	Owner
tes1t.txt	344 bytes	Text Docu...	7/4/1990	-rw-rw-rw-		user
config.jpg	3.56 KB	JPEG image	12/3/2014	-rw-rw-rw-		user
0.jpg	9.71 KB	JPEG image	9/16/2015 3:35:00 PM	-rw-rw-rw-		user
test.txt	17 bytes	Text Docu...	10/2/2015 8:13:00 PM	-rw-rw-rw-		user

Below the directory listing is a terminal window showing two command executions:

```
COMMAND:> [10/29/2015 2:12:32 PM] OPTS MLST size;modify;create;type;perm;  
[10/29/2015 2:12:32 PM] 200 MLST OPTS Size;Modify;Create;Type;Perm;  
COMMAND:> [10/29/2015 2:12:41 PM] MLST 0.jpg  
[10/29/2015 2:12:41 PM] 250- Listing /0.jpg  
Type=file;Size=9946;Modify=20150916153502;Create=20150916153502;Perm=adfrw; 0.jpg  
250 End  
COMMAND:> [10/29/2015 2:12:56 PM] OPTS MLST Size;Modify;Create;Type;Perm;  
[10/29/2015 2:12:56 PM] 200 MLST OPTS  
COMMAND:> [10/29/2015 2:13:01 PM] MLST 0.jpg  
[10/29/2015 2:13:01 PM] 250- Listing /0.jpg  
0.jpg  
250 End
```

Must use all lowercase.
