- EFT, v7.0 and later

QUESTION

Which browsers versions are supported with EFT clients?

ANSWER

Browser manufacturers frequently update their browsers to adapt to the market need and, more importantly, to protect users against the latest security threats.

Fortra's Globalscape Quality Control tests EFT clients (WTC, Workspaces) with the current browser version available at the time of testing, prior to EFT release date, as shown in the table below.

EFT v8.x does not support UPLOADS from CAC-authenticated users when using Chrome or Edge browsers. Firefox (and possibly other browsers) will work.

Only the versions of Internet Explorer (IE) listed in the table have been tested by Globalscape QA, and only with that specific version of EFT. Older versions of IE are not supported. IE versions that were available for Windows 7 are no longer supported.

(Internet Explorer does support uploads >4GB.)

EFT versions prior to v7.4.1 have reached End of Life (EOL) and are no longer supported, and only listed here for historical reference. Refer to <https://kb.globalscape.com/Knowledgebase/10528/Officially-Supported-Products-and-EOL-Dates> for information about EOL.
