

Set the OpenPGP cipher algorithm

THE INFORMATION IN THIS ARTICLE APPLIES TO:

- EFT v7.2 and later

DISCUSSION

The following advanced properties can be used to set the OpenPGP cipher algorithm.

Prior to v8, add the properties below to the registry:

HKEY_LOCAL_MACHINE\Software\WOW6432Node\GlobalSCAPE Inc.\EFT Server 7.2\

v8 and later:

Add the advanced properties below to the AdvancedProperties.json file:

(AdvancedProperties.json is installed by default in **C:\ProgramData\Globalscape\EFT Server Enterprise**. Refer to https://help.globalscape.com/help/eft8-0/Advanced_Properties.htm for more information.)
