

EFT AD Site not in sync with AD domain controller

THE INFORMATION IN THIS ARTICLE APPLIES TO:

- EFT Enterprise v 7.4.5.3 and later
- EFT Enterprise v7.3.9.3 and later (in the 7.3 line)

DISCUSSION

When the following registry setting is true, then users will always be enabled for an EFT AD Site. EFT user list will always show the user as enabled, even if disabled in AD. If the user is disabled in Active Directory that user cannot login. If the user is Enabled in Active Directory the user can log in. (EFT respects the user access privilege from Active Directory.)

HKEY_LOCAL_MACHINE\Software\WOW6432Node\GlobalSCAPE Inc.\EFT Server 7.3\

Type: BOOL

Value name: ADUsersAlwaysEnabled

Default Value: false

Cached: yes

Backup/Restore: yes

(There is no 32-bit version because there is no 32-bit OS supported.)
