

Specify maximum number of Cloud Monitor executor threads per EFT Site

THE INFORMATION IN THIS ARTICLE APPLIES TO:

- EFT Enterprise v 7.4.6 and later

DISCUSSION

The Event Rule Monitor Folder process is limited to 3 concurrent threads by default. This means that if you have 5 Cloud Monitor Event Rules monitoring the same folder, and a file is added to the monitored folder, only 3 of the 5 Rules will fire, as determined by the operating system. The 4th and then 5th Rule execute only when one or more of the first three threads are done firing and executing any Actions. If you have, for example, 100 concurrent Monitor Folder Event Rules, they are not all triggered simultaneously.

To specify maximum number of Cloud Monitor executor threads per EFT Site, create the following registry key:

HKEY_LOCAL_MACHINE\Software\WOW6432Node\GlobalSCAPE Inc.\EFT Server 7.4\

Type: DWORD

Value name: MaxCloudMonitorExecutorsPerSite

Default Value: 16

Minimum Value: 1

Maximum Value: 128

Cached: yes

Backup/Restore: yes

(There is no 32-bit version because there is no 32-bit OS supported.)
