Event Rule with DSA ssh key still running while FIPS enabled

THE INFORMATION IN THIS ARTICLE APPLIES TO:

- EFT, v7.x and later

SYMPTOM

Event Rule with DSA ssh key still running while FIPS enabled

WORKAROUND

Restart the EFT server service after enabling FIPS.

MORE INFORMATION

EFT sets FIPS mode at server starting time and caches the connection; therefore, a restart is required for the EFT server service to "re-read" FIPS mode status.
