Using Edge for CAC authentication displays a 404 Object not found error

THE INFORMATION IN THIS ARTICLE APPLIES TO:

- EFT v8 and later

DISCUSSION

If you are using Edge for CAC authentication, it will display a 404 Object not found error.

By default, EFT does not allow cookies to be sent with cross-site requests, resulting in 404 error.

If you want to use Edge for a browser, you will need to set the HttpCookieSameSitePolicy on EFT to Lax.

To set the HttpCookieSameSitePolicy

Add the name:value pair to the AdvancedProperties.JSON file:

{

"HttpCookieSameSitePolicy":"Lax"

}

Default Value: Strict; Acceptable values are "Strict","Lax","None". Values other than these will result in "Strict" value.

Cached: yes

Backup/Restore: yes

For more information about Advance Properties, refer to the online help for your version of EFT.
