

How can I specify the Workspaces cleanup recurrence period?

THE INFORMATION IN THIS ARTICLE APPLIES TO:

- EFT v8.x

QUESTION

How can I specify the Workspaces cleanup recurrence period?

ANSWER

Specify the Workspace recurrence period in the AdvancedProperties.json file.

To specify the recurrence period for Workspace cleanup, add:

WorkspacesCleanupRecurrence

- 0 - minutely (default, or not set),
- 1 - hourly
- 2 - daily

For example: **"WorkspacesCleanupRecurrence":2**

(Not applicable for HA servers as clusters; expiration occurs on daily cleanup.)

To specify the limits the number of workspaces cleaned up in a single pass so there is minimal EFT operational disruption, add:

WorkspacesCleanupPortionSize

- 0 - minimum (no limit)
- 1000 - default
- 4294967295 - maximum

For example: **"WorkspacesCleanupPortionSize":500**

For more information about Advanced Properties, refer to the [online help](#) for your version of

How can I specify the Workspaces cleanup recurrence period?

EFT.
