How can I disable the ability to install the EFT server service by non-EFT server administrators?

THE INFORMATION IN THIS ARTICLE APPLIES TO:

- EFT v7.4.4.22

QUESTION

How can I disable the ability to install the EFT server service by non-EFT server administrators?

ANSWER

Add the advanced property below to the AdvancedProperties.JSON file. (Logged in Server admins can still use the **Install service** button.)

```
{
"DisableUIInstallServiceButtonForNonServerAdminsAndNonLocalUsers":1
}
```

If set to 1 = disable install service button for non-server admins and non-local admins.

If set to 0 or doesn't exist(default) = enable install service button for non-server admins and non-local admins.

Prior to v8, add the advanced property to the registry as a DWORD value:

HKEY_LOCAL_MACHINE\Software\WOW6432Node\GlobalSCAPE Inc.\EFT Server 7.0
