

Folder monitor failing when trying to monitor my Azure file share

THE INFORMATION IN THIS ARTICLE APPLIES TO:

- EFT v8.0.2 and later

SYMPTOM

Folder monitor failing when trying to monitor my Azure file share

WORKAROUND

Enable VFS override, and then create a virtual folder that points to the Azure file share path.

MORE INFORMATION

- Refer to "Override VFS Credentials" in your version of the EFT help.
- Refer to "Azure Data Lake Storage" in your version of the EFT help.
