

Configure Outgoing Mail Settings for Advanced Workflows in v8.2

THE INFORMATION IN THIS ARTICLE APPLIES TO:

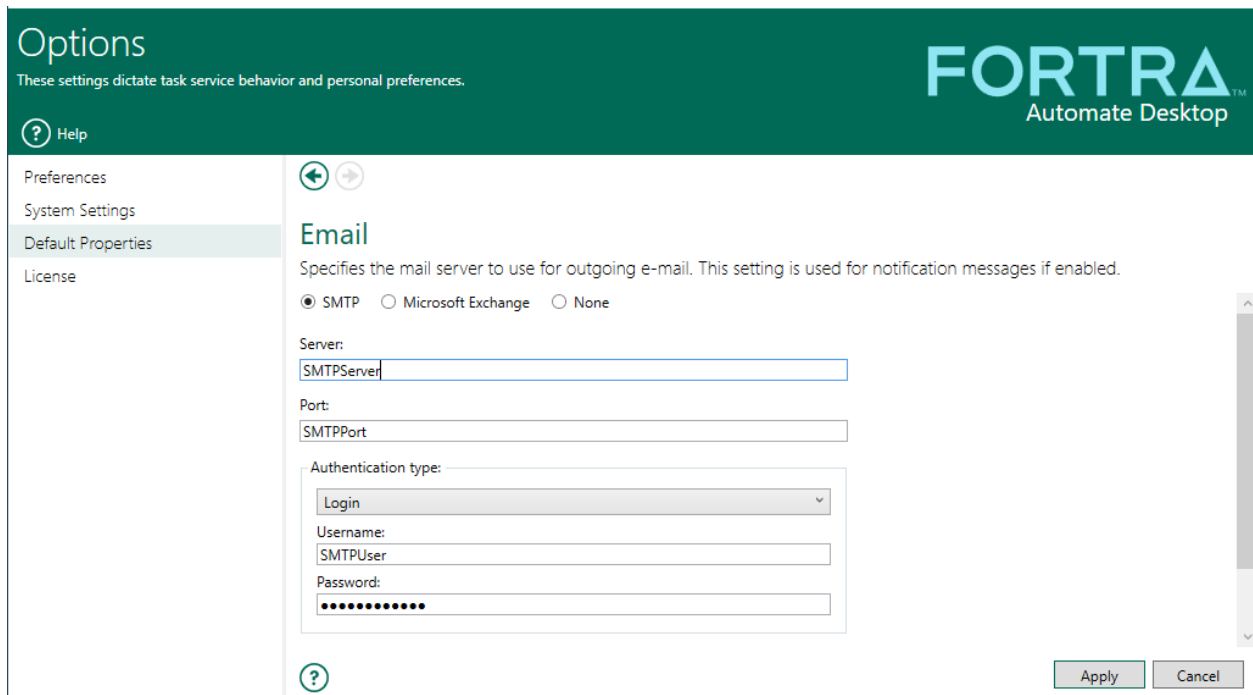

- EFT v8.2.x

DISCUSSION

For Automated Workflows added to EFT event rules, Automate Desktop 2024 requires that you configure the outgoing mail settings in the Automate Desktop Task Administrator interface.

To configure outgoing mail settings for Advanced Workflows in v8.2

1. In the Automate Desktop 2024 Task Administrator, click **Options**.
2. On the **Options** tab, click **Default Properties**.
3. Double-click the **Email** icon.
4. In the **Email** settings, configure the connection as shown below using the server, port, and login credentials for the outgoing mail server that Automate is to use for Automated Workflows in EFT.
5. Click **Apply**.

The screenshot shows the 'Options' dialog box in Automate Desktop. The 'Email' settings are configured as follows:

- Server:** SMTPServer
- Port:** SMTPPort
- Authentication type:** Login
- Username:** SMTPUser
- Password:** [Redacted]

The 'SMTP' radio button is selected. The 'Apply' and 'Cancel' buttons are visible at the bottom right.
