Compress Action Throttle

THE INFORMATION IN THIS ARTICLE APPLIES TO:

- EFT v8 and later

DISCUSSION

The advanced property is used with the Compression Action to avoid excessive CPU utilization on machines with limited CPU bandwidth. Does not apply to ZCompress compression or to decompression actions. When this key is of the form X:Y, a compress action will sleep X milliseconds of every Y milliseconds elapsed.

Add the name:value pair below to the AdvancedProperties.JSON file in the \ProgramData\ folder for EFT (for example, **C:\ProgramData\Globalscape\EFT Server**):

```
{
"CompressActionThrottle":"200:400"
}
```

Example value is 200:400 to sleep 200 milliseconds of every 400 milliseconds elapsed.

MORE INFORMATION

For more information about Advanced Properties, search for "Advanced Properties" in the help for your version of EFT.

For more information about compression, search for "compression" in the help for your version of EFT.

For pre-v8 versions of EFT, the registry value is

SOFTWARE\Wow6432Node\GlobalSCAPE Inc.\EFT Server 7.2
